**i. Description of the method and significant assumption used during the year to estimate the fair value of ESARs including the following information:**

- The weighted-average values of share price, exercise price, expected volatility, expected option life, expected dividends, the risk-free interest rate and any other inputs to the model;
- The method used and the assumptions made to incorporate the effects of expected early exercise;
- How expected volatility was determined, including an explanation of the extent to which expected volatility was based on historical volatility; and
- Whether and how any other features of the ESARs grant were incorporated into the measurement of fair value, such as market conditions.
